Yellow Shortage
LIMITATION

Withhold 2 Yellow dice.

The precision components are on another bench. Nobulous has misplaced the bench.

Reveal before committing required-color dice. Withheld dice cannot be used in this Program.

Green Shortage
LIMITATION

Withhold 2 Green dice.

Mobility actuators have been reassigned to a 'more urgent' prototype.

Reveal before committing required-color dice. Withheld dice cannot be used in this Program.

Blue Shortage
LIMITATION

Withhold 2 Blue dice.

Sensor stock is low; confidence remains inexplicably high.

Reveal before committing required-color dice. Withheld dice cannot be used in this Program.

Purple Shortage
LIMITATION

Withhold 2 Purple dice.

Load-bearing modules are delayed. The load is not.

Reveal before committing required-color dice. Withheld dice cannot be used in this Program.

Diversity Protocol
LIMITATION

Withhold 2 dice of different non-Red colors.

Nobulous demands cross-functional resilience with fewer functions.

Reveal before committing required-color dice. Withheld dice cannot be used in this Program.

Red Quarantine
LIMITATION

Withhold the Red die.

The emergency die is perfectly safe inside the locked cabinet.

Reveal before committing required-color dice. Withheld dice cannot be used in this Program.

Maintain Balance
ROUTINE · STABLE

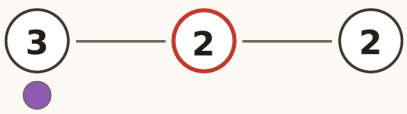

PROGRAM REWARD

Gain 1 HP

The shale frame holds steady while Nobulous adds one unnecessary clipboard.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Lift a Heavy Object
ROUTINE · STABLE

PROGRAM REWARD

Recover 3 exhausted dice

The automaton raises the test mass with reassuring precision.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Climb an Incline
ROUTINE · STABLE

PROGRAM REWARD

+1 REC; remove this Program

Measured steps carry the chassis cleanly up the graded ramp.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

THE NOBULOUS SET

Climb an Incline
ROUTINE · OVERHEATED

PROGRAM REWARD
+1 REC; remove this Program

Each step lands harder than the last; the ramp files a complaint.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Lift a Heavy Object
ROUTINE · OVERHEATED

PROGRAM REWARD
Recover 3 exhausted dice

The test mass rises. The floor follows.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Maintain Balance
ROUTINE · OVERHEATED

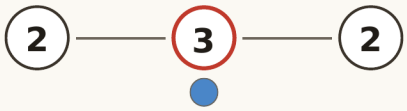

PROGRAM REWARD
Gain 1 HP

The frame still balances, provided nobody breathes near it.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Move at Speed
ROUTINE · STABLE

PROGRAM REWARD

Return 1 Overheated Program to Stable

The timing gates agree: it is fast, controlled, and technically indoors.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Navigate a Passage
ROUTINE · STABLE

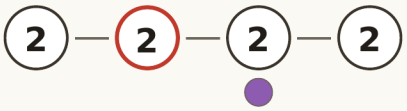

PROGRAM REWARD

+1 STR; remove this Program

The frame folds through the mock corridor without touching a wall.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Cross Uneven Ground
ROUTINE · STABLE

PROGRAM REWARD

Banish 1 Limitation from the game.

Independent joints keep the load level over broken ground.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Manipulate an Object
ROUTINE · STABLE

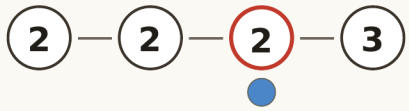

PROGRAM REWARD

Recover 3 exhausted dice

Stone fingers turn the instrument exactly one calibrated notch.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Detect an Obstacle
ROUTINE · STABLE

PROGRAM REWARD

Return 1 Overheated Program to Stable

Its sensors mark every obstruction before contact.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Traverse Difficult Terrain
SPECIALIZED · STABLE

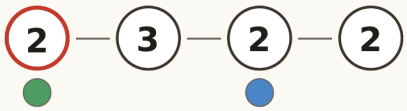

PROGRAM REWARD

Gain 1 HP

The chassis reads the terrain and places each step where the ground will hold.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Move Without Detection
SPECIALIZED · STABLE

PROGRAM REWARD

+1 STR; remove this Program

Noise dampers reduce a stone machine to a passing draft.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Track a Moving Subject
SPECIALIZED · STABLE

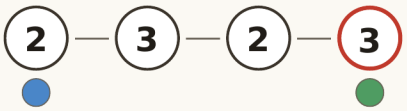

PROGRAM REWARD

Recover 3 exhausted dice

Sensors maintain a calm lock through every change of direction.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Climb a Vertical Surface
SPECIALIZED · STABLE

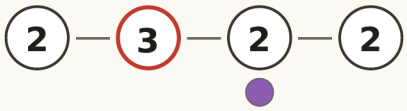

PROGRAM REWARD

+1 REC; remove this Program

Anchors bite, release, and rise in a clean mechanical rhythm.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Cross Uneven Ground
ROUTINE · OVERHEATED

PROGRAM REWARD

Banish 1 Limitation from the game.

The joints correct so violently that the ground becomes the stable part.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Navigate a Passage
ROUTINE · OVERHEATED

PROGRAM REWARD

+1 STR; remove this Program

The corridor is now wider, though not by design.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Move at Speed
ROUTINE · OVERHEATED

PROGRAM REWARD

Return 1 Overheated Program to Stable

It clears the final gate before the first one stops shaking.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Traverse Difficult Terrain
SPECIALIZED · OVERHEATED

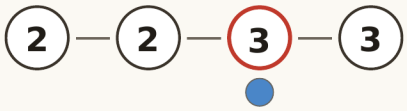

PROGRAM REWARD

Gain 1 HP

It reads the terrain correctly, then challenges every conclusion.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Detect an Obstacle
ROUTINE · OVERHEATED

PROGRAM REWARD

Return 1 Overheated Program to Stable

It detects each obstruction immediately after impact.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Manipulate an Object
ROUTINE · OVERHEATED

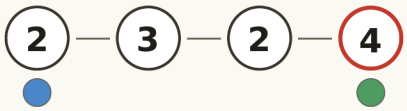

PROGRAM REWARD

Recover 3 exhausted dice

The instrument turns three notches and ceases to be calibrated.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Climb a Vertical Surface
SPECIALIZED · OVERHEATED

PROGRAM REWARD

+1 REC; remove this Program

The anchors bite deeper; sections of wall begin climbing too.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Track a Moving Subject
SPECIALIZED · OVERHEATED

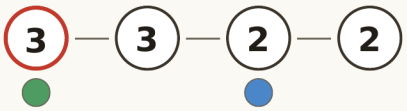

PROGRAM REWARD

Recover 3 exhausted dice

The lock tightens until every movement looks like an escape attempt.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Move Without Detection
SPECIALIZED · OVERHEATED

PROGRAM REWARD

+1 STR; remove this Program

The dampers hold; the footprints still resemble impact craters.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Clear an Obstacle
SPECIALIZED · STABLE

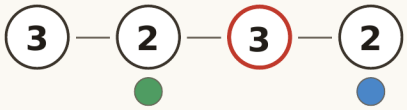

PROGRAM REWARD

Return 1 Overheated Program to Stable

It measures the barrier and clears it with centimeters to spare.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Operate in Low Light
SPECIALIZED · STABLE

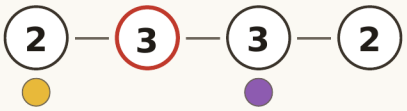

PROGRAM REWARD

Banish 1 Limitation from the game.

Passive sensors map the dark without announcing their presence.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Maintain a Pursuit
SPECIALIZED · STABLE

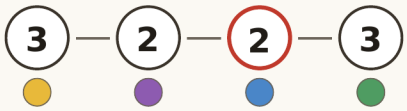

PROGRAM REWARD

Recover 3 exhausted dice

It matches the subject's pace without closing too quickly.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Carry a Moving Load
SPECIALIZED · STABLE

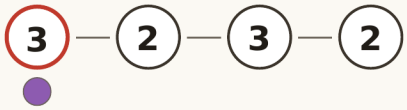

PROGRAM REWARD

Return 1 Overheated Program to Stable

Compensators cradle the shifting load through every turn.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Navigate Without Guidance
UNSTABLE · STABLE

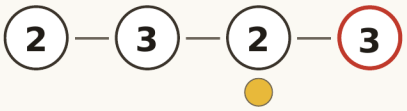

PROGRAM REWARD

Gain 1 HP

The automaton builds a route from landmarks and quiet inference.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Evade Observation
UNSTABLE · STABLE

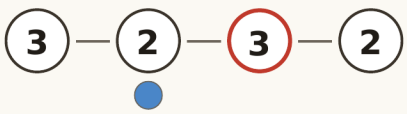

PROGRAM REWARD

+1 REC; remove this Program

Timing and cover reduce a stone chassis to a rumor.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Overcome a Barrier
UNSTABLE · STABLE

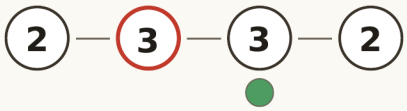

PROGRAM REWARD

Return 1 Overheated Program to Stable

The frame tests the obstruction, then applies exactly enough force.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Intercept a Moving Subject
UNSTABLE · STABLE

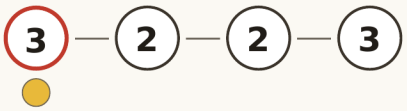

PROGRAM REWARD

+1 STR; remove this Program

Prediction places the automaton precisely in the subject's path.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Maintain Control of a Load
UNSTABLE · STABLE

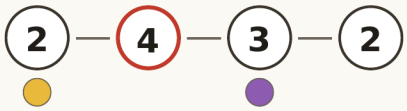

PROGRAM REWARD

Recover 3 exhausted dice

Micro-corrections keep unstable cargo centered and intact.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Maintain a Pursuit
SPECIALIZED · OVERHEATED

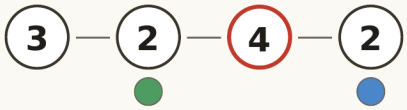

PROGRAM REWARD

Recover 3 exhausted dice

Pursuit logic discards 'too quickly' as an unnecessary constraint.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Operate in Low Light
SPECIALIZED · OVERHEATED

PROGRAM REWARD

Banish 1 Limitation from the game.

The map is perfect; the glowing heat signature is less subtle.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Clear an Obstacle
SPECIALIZED · OVERHEATED

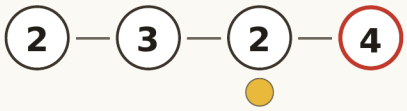

PROGRAM REWARD

Return 1 Overheated Program to Stable

It clears the barrier. The barrier does not clear it.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Evade Observation
UNSTABLE · OVERHEATED

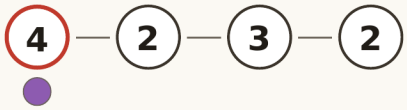

PROGRAM REWARD

+1 REC; remove this Program

It avoids every observer except the ones staring at the new hole.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Navigate Without Guidance
UNSTABLE · OVERHEATED

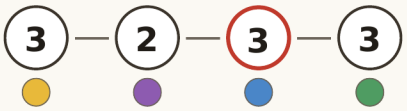

PROGRAM REWARD

Gain 1 HP

It builds several routes and attempts all of them at once.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Carry a Moving Load
SPECIALIZED · OVERHEATED

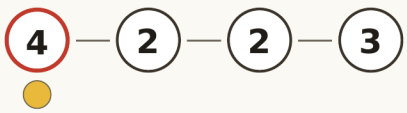

PROGRAM REWARD

Return 1 Overheated Program to Stable

The load remains secure while everything beneath it shifts.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Maintain Control of a Load
UNSTABLE · OVERHEATED

PROGRAM REWARD

Recover 3 exhausted dice

Corrections accelerate until the cargo is the calmest thing in motion.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Intercept a Moving Subject
UNSTABLE · OVERHEATED

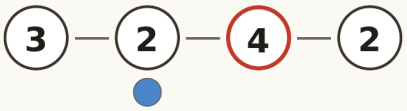

PROGRAM REWARD

+1 STR; remove this Program

Prediction becomes certainty; the path has no remaining alternatives.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Overcome a Barrier
UNSTABLE · OVERHEATED

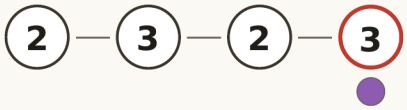

PROGRAM REWARD

Return 1 Overheated Program to Stable

It applies exactly enough force to redefine the obstruction.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Adapt to Changing Terrain
UNSTABLE · STABLE

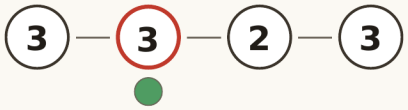

PROGRAM REWARD

Banish 1 Limitation from the game.

The gait rewrites itself as the ground changes.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Execute a Complex Route
UNSTABLE · STABLE

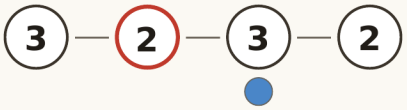

PROGRAM REWARD

Recover 3 exhausted dice

Every turn arrives on time, in sequence, and without hesitation.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Operate Autonomously
UNSTABLE · STABLE

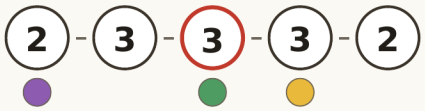

PROGRAM REWARD

Return 1 Overheated Program to Stable

It completes the objective without instruction or improvisation.

1 failed element: this Program Overheats. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

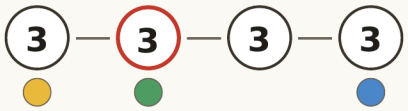

Rapid Approach
ADVANCED · STABLE

It reaches the target before the warning can become an alarm.

2+ failed elements: lose 1 HP, or exhaust 2 misses on them; either way the next Advanced Program Overheats. 0-1: it stays Stable. Recover between Advanced Programs.

Unobserved Entry
ADVANCED · STABLE

Locks open, cameras loop, and the corridor never learns it was occupied.

2+ failed elements: lose 1 HP, or exhaust 2 misses on them; either way the next Advanced Program Overheats. 0-1: it stays Stable. Recover between Advanced Programs.

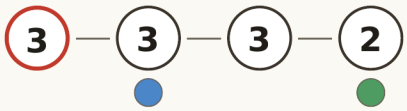

Subject Acquisition
ADVANCED · STABLE

It identifies, isolates, and secures the designated subject without disturbing the room.

2+ failed elements: lose 1 HP, or exhaust 2 misses on them; either way the next Advanced Program Overheats. 0-1: it stays Stable. Recover between Advanced Programs.

Difficult Extraction
ADVANCED · STABLE

It carries the subject through the least impossible route.

2+ failed elements: lose 1 HP, or exhaust 2 misses on them; either way the next Advanced Program Overheats. 0-1: it stays Stable. Recover between Advanced Programs.

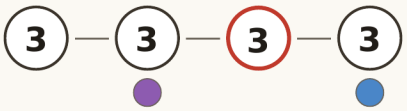

Autonomous Infiltration
ADVANCED · STABLE

It enters, adapts, and advances without a single transmitted instruction.

2+ failed elements: lose 1 HP, or exhaust 2 misses on them; either way the next Advanced Program Overheats. 0-1: it stays Stable. Recover between Advanced Programs.

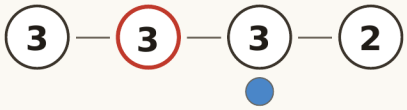

Controlled Restraint
ADVANCED · STABLE

Force sensors hold the subject firmly below the injury threshold.

2+ failed elements: lose 1 HP, or exhaust 2 misses on them; either way the next Advanced Program Overheats. 0-1: it stays Stable. Recover between Advanced Programs.

Operate Autonomously
UNSTABLE · OVERHEATED

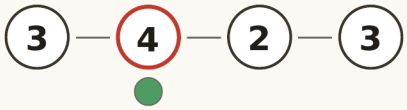

PROGRAM REWARD

Return 1 Overheated Program to Stable

It completes a different objective with alarming confidence.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Execute a Complex Route
UNSTABLE · OVERHEATED

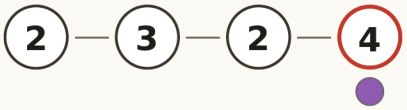

PROGRAM REWARD

Recover 3 exhausted dice

The sequence remains flawless; the surrounding architecture does not.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

Adapt to Changing Terrain
UNSTABLE · OVERHEATED

PROGRAM REWARD

Banish 1 Limitation from the game.

The gait keeps rewriting after the ground stops.

1 failed element: this Program is set aside. 2+ (Catastrophic Failure): lose 1 HP, or exhaust 2 misses on them.

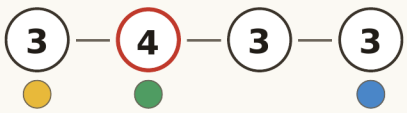

Subject Acquisition
ADVANCED · OVERHEATED

It secures the subject, several bystanders, and the room's structural supports.

2+ failed elements: lose 1 HP, or exhaust 2 misses on them; either way the next Advanced Program Overheats. 0-1: it stays Stable. Recover between Advanced Programs.

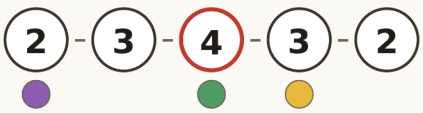

Unobserved Entry
ADVANCED · OVERHEATED

Locks open, cameras loop, and the corridor becomes difficult to explain.

2+ failed elements: lose 1 HP, or exhaust 2 misses on them; either way the next Advanced Program Overheats. 0-1: it stays Stable. Recover between Advanced Programs.

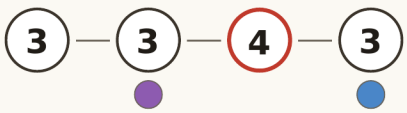

Rapid Approach
ADVANCED · OVERHEATED

It reaches the target before the warning—and most of the doorway.

2+ failed elements: lose 1 HP, or exhaust 2 misses on them; either way the next Advanced Program Overheats. 0-1: it stays Stable. Recover between Advanced Programs.

Controlled Restraint
ADVANCED · OVERHEATED

The threshold remains documented, if no longer especially relevant.

2+ failed elements: lose 1 HP, or exhaust 2 misses on them; either way the next Advanced Program Overheats. 0-1: it stays Stable. Recover between Advanced Programs.

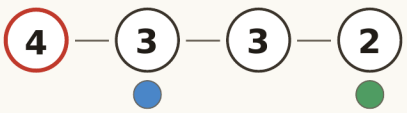

Autonomous Infiltration
ADVANCED · OVERHEATED

Silence is maintained because it has stopped accepting instructions.

2+ failed elements: lose 1 HP, or exhaust 2 misses on them; either way the next Advanced Program Overheats. 0-1: it stays Stable. Recover between Advanced Programs.

Difficult Extraction
ADVANCED · OVERHEATED

The route becomes less impossible as walls become optional.

2+ failed elements: lose 1 HP, or exhaust 2 misses on them; either way the next Advanced Program Overheats. 0-1: it stays Stable. Recover between Advanced Programs.

Adaptive Pursuit
ADVANCED · STABLE

It learns each evasion and closes the next escape before it begins.

2+ failed elements: lose 1 HP, or exhaust 2 misses on them; either way the next Advanced Program Overheats. 0-1: it stays Stable. Recover between Advanced Programs.

Council Extraction Protocol
ADVANCED · STABLE

The automaton escorts the Councilor out beneath a veil of perfect procedure.

2+ failed elements: lose 1 HP, or exhaust 2 misses on them; either way the next Advanced Program Overheats. 0-1: it stays Stable. Recover between Advanced Programs.

Architect
EXPERIMENTAL TECHNICIAN

HP 2 | STR 2 | REC 3

RECONFIGURE

Once per Program, before rolling an element, move up to 2 allocated dice between unresolved elements.

Choose one Technician card and one side at setup.

Optimizer
EXPERIMENTAL TECHNICIAN

HP 2 | STR 2 | REC 3

OPTIMIZE

Once per Program, Target +1 successes may count as Optimal Implementation.

Choose one Technician card and one side at setup.

Operator
EXPERIMENTAL TECHNICIAN

HP 2 | STR 2 | REC 3

WORKAROUND

When a non-Red Limitation would withhold 2 dice, you may withhold 1 of those dice as another non-Red color instead.

Choose one Technician card and one side at setup.

Element 1
DICE ALLOCATION

Place all dice assigned to this element here before running the Program.

Element 2
DICE ALLOCATION

Place all dice assigned to this element here before running the Program.

Element 3
DICE ALLOCATION

Place all dice assigned to this element here before running the Program.

Element 4
DICE ALLOCATION

Place all dice assigned to this element here before running the Program.

Debugger
EXPERIMENTAL TECHNICIAN

HP 2 | STR 2 | REC 3

DEBUG
Once per Program, after failing by exactly 1 success, reroll 1 allocated die. If it still fails, exhaust that die.

Choose one Technician card and one side at setup.

Council Extraction Protocol
ADVANCED · OVERHEATED

3 – 4 – 3 – 3 – 3

The Councilor is extracted. The Council chamber is now an open-plan space.

2+ failed elements: lose 1 HP, or exhaust 2 misses on them; either way the next Advanced Program Overheats. 0-1: it stays Stable. Recover between Advanced Programs.

Adaptive Pursuit
ADVANCED · OVERHEATED

2 – 4 – 3 – 3 – 2

It learns too quickly; every movement becomes evidence of escape.

2+ failed elements: lose 1 HP, or exhaust 2 misses on them; either way the next Advanced Program Overheats. 0-1: it stays Stable. Recover between Advanced Programs.
